

## Self-immolations in Tibet

In Tibet, 147 Tibetans have resorted to self-immolating to protest against the Chinese government's oppressive regime; of whom 126 are known to have died. The condition and whereabouts of the others are not known, though some are reported to be in hospital. The first self-immolation took place in February 2009. In 2017, there were two self-immolations in Tibet.

Background | Cases | Take Action

Why are Tibetans self-immolating?

The tragic act of self-immolation reflects the desperation Tibetans inside Tibet currently feel. These Tibetans have been driven by the deteriorating situation inside Tibet, the years of repression and the deep frustration at the lack of any progress towards a just and peaceful solution. Almost all have shouted slogans during their protest, and the vast majority have called for the Dalai Lama to be allowed to return to Tibet. Many have also called for freedom for Tibet, for human rights to be respected, for religious freedom, for unity amongst Tibetans and, in some instances, for independence.

The Chinese government's policies in Tibet, which restrict freedoms and basic human rights, have intensified since 2008 when Tibetans across Tibet protested against Chinese rule. There has been an increase in the number of troops stationed in Tibetan areas and monks and nuns have been subjected to 'patriotic re-education' sessions. Demonstrations in Tibet have continued since 2008, with heavy sentences handed down to protestors. The act of self-immolation may be one of the last actions that these Tibetans feel they have control over, and their hope is to draw attention to the situation and ultimately bring about positive change for their fellow Tibetans.

### Self-immolations outside of Tibet

Passang Lhamo, 13 September 2012, Beijing

Passang Lhamo, 62, self-immolated in China's capital city of Beijing on 13 September 2012. Pasang is understood to have set herself on fire in protest against illegal land-grabbing by Chinese authorities in the Jyekundo (Yushu) region of eastern Tibet following the devastating 2010 earthquake. A major rebuilding programme meant Pasang was forced to move from her ancestral home.

According to the Central Tibetan Administration, Passang Lhamo self-immolated after "repeated appeals to the central authorities in Beijing failed to yield any concrete results". She was reportedly taken to hospital and treated for "severe burn injuries". Her current condition and whereabouts is not known. (Reports of the incident only emerged in January 2013 due to China's strict controls over sensitive information.) Further reading: CTA

Passang Lhamo is the second Tibetan known to have self-immolated in protest against government policies of forced evictions and land seizures, after Dickyi Choezom set fire to herself on 27 June 2012.

Thubten Ngodrup, 27 April 1998, Delhi, India. Died (CTC & Jamyang Norbu blog)

### Unconfirmed self-immolations

[February 2012] Three Tibetans reportedly self-immolated on 2 February 2012 in the remote village of Phuwu in Serthar (Chinese: Seda) county, Kardze Tibetan Autonomous Prefecture, Sichuan province. The three Tibetans were said to be herders, one of whom was said to have died and the other two seriously injured. However, due to the communications blackout imposed by the Chinese authorities this incident has yet to be confirmed. Until this incident has been verified the names are not being added to the list of the Tibetans who have self-immolated.

### Take Action

China has to be called to account, not only to end the crackdown in Tibet but also to respect the fundamental rights and freedoms of the Tibetan people. The British government must publicly state its concern over the current situation and, along with other international governments, persuade China to ease the increasingly tense situation by withdrawing its

troops from Tibetan regions, review its repressive policies in Tibet and grant universally recognised human rights to the Tibetan people.
